

YSL-2000HD

Multi-Function Speed & Length Meter

- Two slide-on measuring heads (included) make it simple to rapidly convert from one function to another.
- Accuracy of $\pm 0.02\%$.
- Built-in memory for last, maximum, minimum value.
- NIST Certification Included
- 5 Year Warranty

The CHECK-LINE YSL-2000HD combines the functions of three separate instruments in one, easy-to-use device.

It accurately measures the speed and length of yarns, and other filaments using a unique "wrapper" roller. This precision roller directs the filament onto the low-inertia, U-grooved measuring wheel to maximize contact and eliminate filament slip and breakage.

The YSL-2000HD also functions as a contact or non-contact tachometer to measure rotational speeds of shafts, motors, pulleys, etc. or linear speeds of moving surfaces such as conveyor belts, webs of paper or fabric, etc.

Measuring heads snap on and off quickly and easily to accommodate contact or non-contact tachometer use.
