

FLUKE®

NEW Fluke 975 AirMeter™ test tool combines five powerful air quality tools into one.

Identify and diagnose indoor air quality issues quickly and easily with one rugged, handheld device. The Fluke 975 measures and simultaneously displays temperature, humidity, CO₂, and CO. At the press of a button, it quickly measures air velocity or calculates air flow and percentage of outside air.

Use the all-in-one AirMeter to:

- Maximize comfort conditions for building occupants
- Quickly respond to indoor air quality concerns
- Verify the operation of HVAC control systems
- Monitor air flow and velocity to ensure proper ventilation
- Check for dangerous carbon monoxide leaks

Like all Fluke tools, the Fluke 975 is designed to save you time and money with long lasting ruggedness and reliability.

Fluke. Keeping your world up and running.™
